

**T**he cloud environment requires high speed equipment to handle the ever increasing amount of data required. The challenge is who can provide the related ICT equipment with a matching high performance passive optical interconnection that delivers easy deployment, high accuracy, stability, reliability, and consistency.

**E**ast Point Communications has built a reputation of “World Class” in providing outstanding passive optical interconnect solutions to high rate network equipment. We understand our client’s requirements and build a passive optical interconnect solution that exceeds our client’s expectations. Quality, performance and value are our drivers to succeed with our clients. What makes East Point different is our ability to design customized solutions as well as the ability to provide turnkey solutions.
